Let us take your concept to the next level.

MISSION STEEL FABRICATION

QUALITY WITH INTEGRITY - LIC#FB03032

Mission Steel Fabrication is located in San Bernardino County, California.

We are a full-service LA City approved metal fabrication shop, located in a 30,000 sq. ft. facility on a five acre lot. We have over 20 years experience in structural & custom metal fabrication.

We are a financially strong company dedicated to lowering your risk by providing total value. We offer clear communication, with direct access to our upper management, a completely responsive team who will see your project through start to finish.

If you are targeting growth and improved profit margins, you probably work under serious budget and time constraints to meet internal demand for fabricated parts. You need a metal fabrication supplier that prioritizes your company's needs by optimizing production for lower costs and maintaining high standards for product quality.
